

MANIKANDAN A

Full Stack Developer | Java | Spring Boot | Angular

+91 9361126528 • manikandanav52@gmail.com • linkedin.com/in/manikandan-anbazhagan

PROFESSIONAL SUMMARY

Full Stack Developer with 4 years of experience designing, developing, and deploying scalable applications using Java, Spring Boot, Angular, and microservices architecture. Skilled in building end-to-end solutions from database design to responsive frontend interfaces. Strong foundation in Java fundamentals (OOP, Collections, Exception Handling), REST API development, and cloud deployment. Experienced with Agile methodologies, CI/CD pipelines, and modern development tools.

TECHNICAL SKILLS

Java Fundamentals: Java 8+/17, OOP (Encapsulation, Inheritance, Polymorphism, Abstraction), Collections Framework (List, Set, Map), Exception Handling, Multithreading

Backend Frameworks: Spring Framework, Spring Boot, Spring MVC, Spring Cloud, Spring Batch, Hibernate, JPA, Spring Data JPA

Frontend Technologies: Angular, HTML5, CSS3, JavaScript (ES6+), responsive web design

API Development: RESTful APIs, SOAP Web Services, JSON, XML, HTTP/HTTPS protocols

Databases: MySQL, PostgreSQL, SQL Query Optimization, database design

Testing & Debugging: JUnit, unit testing, API testing with Postman, debugging, code troubleshooting

Build & DevOps Tools: Maven, Gradle, Jenkins, Docker, Kubernetes, Tekton, OpenShift, Git, GitHub, Bitbucket

IDEs & Tools: IntelliJ IDEA, Eclipse, SonarQube, Postman, Jasper Soft Studio, logging frameworks

Architecture: Microservices Architecture, cloud platforms (GCP, AWS)

PROFESSIONAL EXPERIENCE

Tech Mahindra — Software Engineer (Ford Project)

Feb 2024 – Feb 2025

- Developed full-stack solutions by building backend services and supporting frontend integration for Ford Motor Company's cloud modernization initiative, migrating legacy applications from PCF to Google Cloud Platform (GCP)
- Led the migration of legacy applications from Struts to Spring Boot, redesigning the application architecture, refactoring business logic, modernizing REST APIs, and improving maintainability, scalability, and overall application performance.
- Implemented robust REST APIs and SOAP Web Services using Java 17 with Spring Boot, applying OOP principles (encapsulation, inheritance) and design patterns for clean, maintainable code
- Worked with Hibernate and Spring Data JPA for efficient database operations, optimized PostgreSQL queries (improved performance by 30%), and managed exception handling and transaction management
- Automated CI/CD pipelines using Tekton, managed containerized deployments with Docker and Kubernetes in OpenShift, ensuring seamless integration and zero-downtime deployments
- Created comprehensive API test suites using Postman, implemented JUnit-based unit tests, performed debugging and code troubleshooting, and integrated automated testing with Jenkins
- Utilized version control with Git and GitHub, followed Agile methodologies, and collaborated with cross-functional teams including frontend developers on Angular integration

Annaa Silicon Technology Pvt Ltd, Kumbakonam — Backend Developer

Mar 2022 – Nov 2023

- Built and deployed backend microservices using Java, Spring Boot, and Hibernate, architecting scalable solutions for billing, accounting, and reporting modules
- Designed and implemented RESTful APIs supporting JSON and XML data formats, improving API response times by 40% through optimized data access logic and Collections Framework usage
- Integrated Jasper Soft Studio for generating real-time reports and dashboards; worked with MySQL database optimization and SQL query analysis
- Collaborated with frontend teams using Angular to ensure seamless API integration and end-to-end functionality across the full stack
- Performed code reviews, debugging, and troubleshooting; implemented logging frameworks for system monitoring in AWS environment

We Fix Software Solution, Kumbakonam — Software Trainee

Dec 2020 – Mar 2022

- Developed and maintained web applications using Java, Spring Boot, and Hibernate, gaining hands-on experience with full-stack development
- Assisted in API testing with Postman, bug resolution, JUnit test writing, and code debugging to support client deliverables

KEY PROJECT HIGHLIGHTS

Ford PCF to GCP Cloud Migration

- Architected and implemented microservices migration from PCF to GCP using Spring Boot, ensuring scalability, resilience, and cost efficiency
- Modernized legacy Struts-based applications to Spring Boot microservices, applying OOP principles for cleaner code structure
- Ensured zero-downtime deployments using Kubernetes and OpenShift, with comprehensive CI/CD pipeline automation

Enterprise Data & Reporting Platform

- Developed full-stack backend modules using Spring Boot for billing and accounting operations with Angular frontend integration
- Integrated REST APIs with MySQL, optimized queries, and improved report generation performance by 25%
- Implemented JUnit testing, debugging practices, and monitoring with logging frameworks

EDUCATION

Master of Computer Applications (MCA) — Govt. Arts & Science College, Kumbakonam

Scored 82% • Relevant coursework: Process Design, Project Management

Bachelor of Computer Applications (BCA) — Sri Sankara Arts & Science College, Kumbakonam

Scored 72% • Relevant coursework: Database Management Systems, Software Engineering

ADDITIONAL INFORMATION

- Proficient in Agile methodologies, code review, cross-functional collaboration, and full-stack development practices
- Strong problem-solving, debugging, and troubleshooting skills across frontend and backend systems
- Excellent communication skills and immediate availability for Full Stack Developer opportunities
